PROFESSIONAL SUMMARY

Motivated ICT Applications Development graduate with practical experience in Java, JavaScript, SQL, web development and software projects. Currently a Digital Associate in the CAPACITI Software Engineering programme, gaining hands on experience in software development, UX/UI design and team projects. I enjoy learning new technologies, solving problems and building software, and I am looking for an opportunity to grow as a Junior Developer while gaining real-world experience.

EDUCATION

- Diploma in ICT in Applications Development (2025)
- National Senior Certificate (NSC) Mariazell High School (2019)

WORK EXPERIENCE

Digital Associate — CAPACITI (July 2026-Present)

- Developing software projects as part of the CAPACITI Software Development programme.
- Working with technologies including JavaScript, React, HTML, CSS and Git/GitHub.
- Designing user interfaces and interactive prototypes using Figma.
- Working on team projects involving web development, Artificial Intelligence and research.
- Using AI-assisted development tools to support coding, research and prototyping.
- Working with other team members to plan, develop and present technology solutions.

Tutor - Walter Sisulu University (May 2024 - Dec 2024)

- Helped first-year students learn programming and web development.
- Created study materials and gave extra help to students who needed it.
- Supported students to improve their skills and confidence in learning.

Student Assistant – Walter Sisulu University (Jul 2024 – Nov 2024)

- Helped organize academic events and online learning sessions.
- Assisted in keeping online platforms easy to use for students and staff.
- Gave technical support and guidance to improve participation and engagement.

SKILLS

- Programming: Java, JavaScript, Python, React, HTML, CSS, VB.NET
- Database: SQL, Oracle APEX
- Tools: Git, GitHub, Figma, VS Code, Microsoft Office
- Soft Skills: Problem Solving, Teamwork, Communication

PROJECTS

1.School Applications System (Oracle APEX)

Walter Sisulu University | 2025

- Developed a school applications management system as part of a final-year group project.
- Contributed extensively to database design, PL/SQL development, authentication and role-based access.
- Implemented application status tracking, email/OTP functionality and system processes.
- Contributed to the development of the system chatbot.

2.CAPA-Buddy (React, Supabase, PostgreSQL)

CAPACITI | 2026

- Developed an FAQ assistant for a weekly training programme.
- Built features for candidates to access information about Unit Standards, submissions, course access and project instructions.
- Worked with React, Supabase, PostgreSQL and the Claude API.
- Implemented an admin approval workflow and email notifications using SendGrid.
- Developed collaboratively as part of a team project.

3.SentimentIQ (React, TypeScript, Vite)

CAPACITI | 2026

- Developed an e-commerce sentiment analysis dashboard for analysing customer reviews.
- Classified customer feedback as positive, negative or neutral.
- Presented analysed feedback through dashboards and visualisations.

4.TaxGuard — Web Application

CAPACITI | 2026

- Developed a salary and tax tracking application focused on South African employees and PAYE deductions.
- Designed functionality for tracking salary information, tax deductions and tax obligations.

ACHIEVEMENTS AND ADDITIONAL EXPERIENCE

- She Codes Basics
- Introduction to Cybersecurity(Cisco Netacad-2025).
- IT customer support basics(Cisco Netacad-2025)
